FOUNDATION

Introduction

We are thrilled to present this proposal for the construction of a new Bamboo Classroom for the Bali WISE program. This classroom is a crucial step toward enhancing education and training facilities for marginalized young women in Indonesia, empowering them through education and skills development.

About Bali WISE

The Bali WISE program, a transformative initiative by the R.O.L.E. Foundation, is dedicated to uplifting marginalized young women from vulnerable communities by providing them with essential education and comprehensive training in hospitality and tourism.

Since its establishment in 2007, Bali WISE has successfully transformed the lives of nearly 2,000 young women, with an impressive 81% securing long-term, fair job placements through internships or further studies in the program.

These young women are identified through recommendations from local and regional high schools or direct outreach, ensuring that motivated, bright, and skilled individuals—who would otherwise face a life of poverty—are given the opportunity to build a better future.

Bamboo Classroom

As part of our ongoing efforts to enhance and expand the impact of our program, we are embarking on an ambitious project to build an innovative Bamboo Classroom. This initiative aims not only to provide a sustainable and conducive learning environment for our students but also to promote environmental awareness and responsibility.

We invite you to join us in this transformative journey by supporting the creation of the Bamboo Classroom. Your contribution will directly impact the lives of young women, empowering them with the education and skills they need to break free from the cycle of poverty and reach their full potential. Together, we can continue to make a significant difference in the lives of these young women and foster a more sustainable future for our community.

PROJECT OVERVIEW

3D Model

Below is the rendered 3D version of the Bamboo Classroom Building

Budget Breakdown

Bamboo Classroom Building Construction			
Round 1	No.	Preparation & Tools	Cost: Rp. 14,250,000
	1	Area cleaning	Rp3.750.000
	2	Mobilization & demobilization	Rp2.500.000
	3	Tools	Rp2.000.000
	4	Debris cleaning	Rp4.500.000
	5	Electricity	Rp1.500.000
Round 2	No.	Structure Construction	Cost: Rp. 484,782,450
	1	Structure installation	Rp18.604.450
	2	Hebel wall installation	Rp40.258.000
	3	Flooring	Rp81.250.000
	4	Bamboo installation	Rp284.900.000
	5	Roofing (alang-alang)	Rp59.770.000
Round 3	No.	Architecture	Cost: Rp. 18,773,000
	1	Wall painting	Rp4.073.000
	2	Bamboo fence	Rp14.700.000
Round 4	No.	Electricity	Cost: Rp. 12,675,000
	1	Electric socket and lights installation	Rp12.675.000
Total Building Cost in IDR		Rp530.480.450	
Total Building Cost in USD		\$ 32,544	

The construction of the Bamboo Classroom is planned in four phases. The first three phases will focus on the structural development, ensuring a strong and sustainable foundation, while the final phase will involve the procurement and installation of lights and electricity sources.

This phased approach allows for meticulous planning and execution, ensuring that each stage is completed with precision and efficiency. By the time the final phase is reached, the classroom will be fully equipped to provide a high-quality learning environment, seamlessly integrating sustainability and modern functionality.

Timeline

No	Task	Construction Timeline													
		Round 1				Round 2				Round 3				Round 4	
		W1	W2	W3	W4	W1	W2	W3	W4	W1	W2	W3	W4	W1	W2
1	Blueprint design														
2	Area cleaning														
3	Mobilization & demobilization														
4	Debris cleaning														
5	Structure installation														
6	Hebel wall installation														
7	Flooring														
8	Bamboo installation														
9	Roofing (alang-alang)														
10	Wall painting														
11	Bamboo fence														
12	Electric socket and installation														

*Construction estimation including cleaning: 4 months

Longterm Goals

The Bamboo Classroom will allow us to unite both the Bali WISE program and the ZeroWaste Center by R.O.L.E. Foundation in one location.

In the long term, the classroom will not only be used by Bali WISE students but also by public school children, who will learn about proper waste management and sustainable living.

Upon completion of the classroom, R.O.L.E. Foundation aims to secure additional funding to build dormitories, toilets, and kitchen facilities, allowing the entire Bali WISE program to be relocated to the new site.

Reporting

We are committed to full transparency with our donors and supporters. By supporting us, you will receive a comprehensive report detailing the following:

Construction Progress

The current progress of construction, the challenges encountered, and the steps we are taking to mitigate or resolve them.

Training & Workshop

The training and workshops conducted for Bali WISE students in the Bamboo Classroom, along with the number of students who have been educated.

Environmental Training

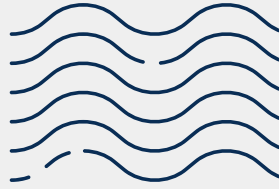

The number of Bali WISE students and public school children who have received environmental training.

Financial Report

A detailed breakdown of how donations are spent on the project will be provided. A full audited report will be available next year.

Play a ROLE!

This proposal represents a significant opportunity to invest in the future of Indonesia's young women. By supporting this project, you will be contributing to a sustainable and expanding program that has a proven track record of lifting individuals and communities out of poverty.

Over 100 young women will be empowered every year

Providing them with meaningful jobs

Empowering their families and communities

Get in Touch

We would love to discuss this sustainable investment further. Please reach out to us through our contact channels below.
